Turgut Karabulut Erler Müessillik

Spinning technology manufacturers that we represent are at the forefront in Turkey market. Turkey is a very important market for them and they are aware of it. They absolutely participate ITM fairs and want to advertise the own latest technologies. For this reason, ITM fairs are of great importance for us.

Ömer San Tekstil Servis

After China and India, the largest market all of the companies that we represent is in Turkey. ITM Fairs are very important for Turkey and surrounding countries. Firms and workers who visited the ITM fair are direct contact with machinery manufacturers and thus provide the opportunity to experience innovations to them.

Andrea Wissenberg Oerlikon Group

ITM 2012 Exhibition is a very good opportunity for us to display our products in 2012 to customers in Turkey and the Middle East. In this way, we aim to deepen our relationships with our customers and to follow the return of ITMA.

Faruk Kılıç Fetekes Müessillik

Turkey is one of the most important countries that make an investment and steadily growing in textiles. Therefore, Turkey is still the most important market for European manufacturers. The newest technological produced machines and products can sell in Turkey. They think that this fair is very important for both Turkey and the Middle East markets.

Levent Cenger Cenger Müessillik

We have seen that not turn global situation, the economic crisis that live some countries in Europe. People are planning investments.

Mehmet Özcan İnter Tekstil

The importance for us of ITM fairs is be close area to the arena for investors of all countries around us and especially for people who are not participate the fair in Europe at the same time it is not for people who are interested from only Turkey.

İsmail Şengüler Dilmenler Makine

ITM fairs has become indispensable demonstration area for Turkey's textile market and also the Arab world which the immediate environment. The benefits and the qualities that provide to sector of these machines that are offered at the fair will enhance participants and visitors interest.

Fritz P. Mayer Karl Mayer

ITM 2012 Exhibition is very good and I think that is a fair very well organized. Fair management was interested in all things, cleanliness is very good. Our customers are very pleased with the machines in the exhibit. ITM fairs are very strong and impressive.

Tolga Baydar İnta Makine

Investments have accelerated with the manifestation of new incentives law. European countries are also seeing that the global economic crisis is not affecting to our country. Europe fairs do not as efficient as Turkey's fairs. Our machines are running all the time because Turkey is the country of textile.

Daisuke Ito Murata Machinery

Fair is going far above our expectations due from Turkey's economy in good shape. Social density is very nice. This participation to ITM 2012 is very promising. The center of the textile industry is in Europe and Turkey, therefore the eyes of everyone are in Turkey.

Rosini Varinelli Marzoli

Everyone knows that the textile industry has continued in Europe country, Turkey. Turkey is one of the best countries in which we do business. Turkey market is very important for us. When there is fluctuation in Europe, on the contrary, Turkey has the very optimistic situation.

Paola Briatore Invista

ITM fairs are very important for Europe and the Middle East, not only for Turkey. Our expectation is increase awareness and our customers in Turkey at the end of the fair. We want to support their development and promote innovations to our customers.

İhsan Mokaçoğlu Has Group

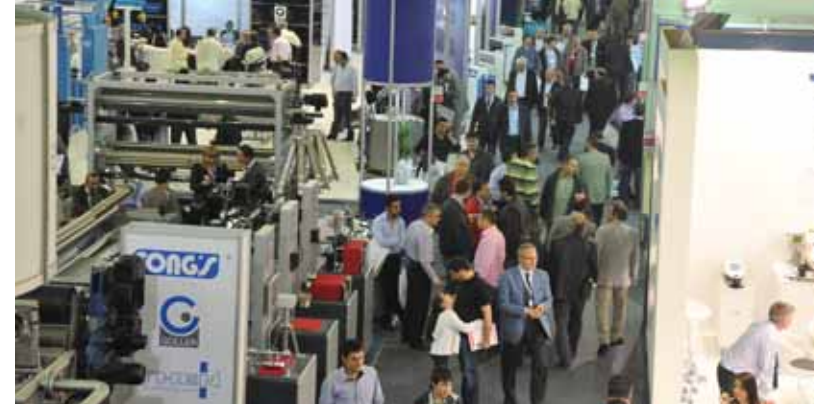

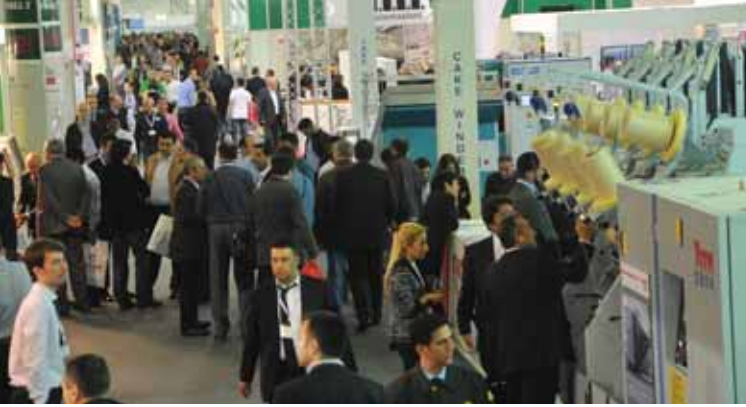

Our expectation from ITM 2012 can show machines production that used by fabrics and home textile manufacturing companies is make very good places in Turkey. We are making significant investments and raising the image of the Turkish machinery manufacturers.

Vedat Anjel Alfredo Modiano

We always encourage ITM fairs. Companies that we represent give great importance to the Turkish textile market. They regard ITM fairs the most effective way to reach customers in Turkey. For this reason, almost all the firms participating in the fair with their machines and coming with crowd team.

Haluk Erbel Erbel Müessillik

Turkey market is of great importance for all companies that we represent. We attach great importance to ITM fair in order to we can show and introduce more interactive our products to our customers in the right place at the same time in this market that has great importance. We consider this fair as indispensable.

The Great Success of ITM Texpo Eurasia 2012 Led the Way for 2013

After the great success of ITM Texpo Eurasia 2012 Exhibition, we are getting prepared for ITM Texpo Eurasia 2013 Exhibition. Thanks to the influence of the incentives, the Turkish textile industrialist realize important technology investments. Thus ITM Texpo Eurasia 2013 Exhibition scheduled for 29 May-01 June 2013 will be the most effective platform for machinery investment.

In our country, Turkey, becoming the center of the world textile production in Eurasia day by day we have recently experienced a successful era also in terms of textile exhibition industry. Textile based exhibitions organized within the first half of 2012 became a power supply for the forthcoming periods. ITM 2012, HIGHTEX 2012 and Istanbul Yarn Fair organized on 21-24 April 2012 were one of these successful events. On the first day of the show more than 15.000 visitors rushed to the fairground creating queues on the main entrance. The exhibition was visited by more than 40.000 visitors from 78 countries in total. During the show, important contracts were signed; briefly both the supplier and the clients were mutually satisfied of the outcome of the show.

ITM Texpo Eurasia planned to be organized in 2014, has been re-scheduled for 2013 due to external and internal factors, the strenght, the growth and motivation in the industry with the cooperation of Teknik Fuarçılık and Tuyap, and the support of TEMSAD. Texpo Eurasia organized annually and being a local textile machinery exhibition and ITM being one of the most important textile machinery exhibitions decided to combine their synergies. The success of the first show organized in that sense has proved to be a right decision; the future exhibitions will be organized as ITM Texpo Eurasia.

On the other hand, the stimulus package recently announced by our government is quite important as this launched a new development attack in our country. It is highly important that a separate page is provided for textiles in this package. It is inevitable that textiles become the shining star of the industry in Turkey thanks to the investment supports, free lands, zero taxes etc. The Turkish textile industry has been the most important employment field during the global economic crisis and our country could overcome this tough era thanks to the textile industry.

All these developments motivate the whole industry to organize a new ITM Texpo Eurasia Exhibition in 2013. We hereby would like to share the happiness and proud to organized ITM Texpo Eurasia 2013 on 29 May-01 June 2013 in Istanbul.

We believe to organize ITM Texpo Eurasia 2013 with great success together as usual and contribute to the improvement and growth of the Turkish economy.

The technology investments, that accelerated in 2012 will also continue in 2013

◆ Republic of Turkey The Government knows that one of the important sectors of textile in Turkey. Therefore, Republic of Turkey Government launches new applications to increase the strength of the sector by explaining the new incentive packages and taking import trade measures. Taken decisions by the government in the last one year such as 'KDV rate reduction in the textile industry, increasing the tax rates to fabric and apparel imports and rationing for cotton yarn' raised the competitiveness of the Turkish textile producers and made improvements to increase production capacity. Following the announcement of investment incentives, have triggered new investments.

◆ Recent stimulus package announced by the government: 'Tax exemptions, Costless land allocation, Paid by the state of half of the Social Security Institution premiums' etc. applications are located. These applications provide an important advantage for the textile employers. The most important reason that to be many visitors and investors in ITM Texpo Eurasia 2012 Fair and take a decision to get ITM Texpo Eurasia 2013 Fair done is this incentive package. Because, the stimulus package have a certain time.

◆ Foreseeing of 1965 units investment incentive certificate that organized in the first 6 months of 2012 found the amount of fixed investment 21.5 billion pounds and the number of employment was 57 thousand 33 people. 308 million lira of these incentives was given woven and clothing manufacturers.

◆ As of 2011, Turkey realized textile machinery imports about 2 billion dollars, whereas the export about 300 million dollars. Imported machines: Spinning, weaving, knitting, auxiliary materials, finishing and apparel machines was. The imported machines productions don't take place in Turkey. Turkey produces only replacement parts of these machines.

◆ Machinists consider this period as a chance for the sector is very important. Therefore, they have begun to rehire employees that have to remove during the crisis to respond to the increasing demand. The textile machinery industry that reached a size of \$ 800 million is expected to grow between 25 and 30 percent in 2012, due to positive developments.

◆ Also many visitors from that renewed Arab countries after the Spring Revolution arrived in ITM Texpo Eurasia 2012 Fair. As is known, investors in Arab countries can come together at trade fairs in Turkey with European sellers. Especially in Europe, the only international activity that includes the world-wide brands with their most recent technologies is ITM Texpo Eurasia. For this reason, wind of this investment in Arab countries that existent in Middle East and North Africa are expected to feel the presence and to continue investments at the fair in 2013.

◆ ITM Texpo Eurasia 2012 Fair's timing was a little troubled. Local fairs at around the world were too much in 2012. According to this density, ITM is a fair that was forcing the requirements of the world's machine manufacturers. Because the machine manufacturer brands that want to maintain their presence in other markets wanted to take part in the full squad, exhibiting their machines in ITM that is one of the most important markets in 2012 with a large exhibition areas. But in 2013, there is not an international or local textile technologies exhibition in the world-wide. So all in all machine manufacturers can bring machines come comfortably and they will be able to fully the permanent staff participation with their teams. Visitors to the neighbouring countries and the Turkish textile producers might look at machinery come to the fair.
